That's perfect, Charles, thank you very much. Again Tom's focus is going to be on understanding the distance between the CARC and IARC assessments.

Hi Tina,

Along with Danelle, I participated in the OPP Cancer Assessment Review Committee (CARC) review of glyphosate. (I have served as the CARC pathologist for several years.) My focus was the animal data. I spoke with Jackie this morning and plan to be on the call with Tom Burke tomorrow. Let me know if you need more information.

Thanks Danelle. Just so you know as background, Tom Burke and to some extent NCEA are not entirely comfortable with the divergence of the cancer assessment from the IARC position. The reasons may be solid, but they have not been discussed. So, there is a briefing by OPP for Tom tomorrow – we have asked that you and Charles to be added to that briefing. Also OSP (Jackie McQueen) is leading a coordinated effort across ORD to review the cancer and risk assessments. She may have pinged you already, or will do so soon. The review will include NHEERL, NERL, NCEA, and NCCT.

Thanks for getting back to me so quickly.

Tina

Hi Tina,

I was involved with reviewing the epi literature for the cancer assessment. I was not involved with the overall risk assessment.

Subject: quick question

Hello Charles and Danelle,

Others may have asked but I am away at SETAC and a little time lagged. Were you two involved with OPP's glyphosate risk and cancer assessments? If so, to what extent.

Thanks so much,

Tina
